Subject: RE: Formaldehyde review materials

Hi Andrew,

Thanks for the update. I would like to look at some of the DNT studies, but please note that I'm traveling tomorrow through July 15th. While traveling I won't be able to review the studies due to prior commitments. I believe the formaldehyde review deadlines are July 11th for the NTX workgroup and July 16th for Deve/ Repro group. During the Deve/ Repro meeting yesterday we agreed that I would read the relevant sections ahead of discussion with the group, but wouldn't be a primary reviewer given the schedule. Is there another member of the NTX group that can review the DNT studies within the necessary timeline?

Sorry not to be of more support here...

Christy

Thanks for the info, John. I really need to start looking at distribution lists on emails I receive.

I am guessing you didn't receive the charge, etc. either then? Here it is (also on the L drive).

Also, another thing that would be useful to get comments on – is sufficient experimental detail provided in the evidence tables so that you don't feel you have to go back to the study or appendix to confirm my conclusions?

Christy—Just talked with Sue; sounds like you will be looking at the DNT studies (i.e., Songur, Aslan, Sarsilmaz, Senichekova, and Sheveleva)... Great!

Andrew

Hey Andrew,

Happy Wednesday (again)!

Thanks for the materials – you’re the MAN! I didn’t get any emails from Vince, probably because I’m not in the “IRIS” email distribution list. Christy said she had gotten materials from Sue Makris, so I figured I would ask the Neurotox Bosses. ☺

Have a great morning!

John

Sure.

I thought Vince sent it out?

Hey Ambuja and Andrew,

Happy Wednesday! I hope that things are going well for you today up in DC. The humidity and heat have returned to NC.

Would you mind sending me the materials for the formaldehyde neurotox review (i.e., just the tox review)? I can probably start the “initial thoughts” review while I’m waiting for L: drive access.

Let me know if you have any questions. Have a great morning/USA birthday! ☺

John
